## Education

**Northern Arizona University,** Flagstaff, AZ — Mechanical Engineering, Bachelor of Science

AUGUST 2023 - DECEMBER 2027 [IN PROGRESS]

Emphasis in mechanical design, with a focus towards CAD modeling and additive manufacturing, with hands-on experience in CAD-based design and prototyping.

## Professional Experience

**Kiewit,** Idaho Falls, ID — *Equipment Engineering Intern*

JUNE 2026 - AUGUST 2026

- Maintain and organize equipment and parts room while ordering parts for equipment
- Collaborate in preventative maintenance operations while assisting technicians in daily tasks
- Assisting in daily operations (equipment inspections, check DVI reports, managing documentation)
- Create technician operation reports for general and specialized tasks.

**The Steve Sanghi College of Engineering - NAU,** Flagstaff, AZ — *ET Teaching Aid*

JANUARY 2025 - PRESENT

- Maintaining/Allocating academic records for students based on class assignments and projects.
- Researching academic works concerning the development of manufacturing processes.
- Assist with equipment set-up, demonstrations, and academic materials.
- Effectively communicate student and assignment feedback to the instructor and students.

**The Suites,** Flagstaff, AZ — *Leasing Agent*

MAY 2024 - MAY 2026. AUGUST 2026 - PRESENT

- Validating and updating residential records for current and potential prospects.
- Ensuring compliance with company policies and community standards by providing guidance to residents.
- Exhibiting customer service skills through answering prospect inquires and concerns
- Demonstrating effective communication concerning emergencies and property conflicts.

## Projects-Based Experience

**Ponderosa Highschool Greenhouse Capstone** — CAD Designer/Manufacturer

Worked with PHS on upgrading their off grid greenhouse with more solar panels, updated battery storage system, and building a bicycle power generator while teaching students about STEAM.

**Solar Tracking Panel** — Lead CAD Designer

Held responsibilities for creating a XR demo and CAD model for a solar panel that utilizes a tracking sensor and dual axis rotation.

**Hydraulic Crane Stem Kit** — Lead CAD Designer

Worked with a team to create a crane that holds three points of rotation and a rotational base. The model held three syringes to simulate motion similar to hydraulics.

## Skills

- ❖ SolidWorks
- ❖ Fusion 360
- ❖ Bambu Studio
- ❖ Microsoft Excel
- ❖ Microsoft Teams
- ❖ MatLAB
- ❖ Unity Hub
- ❖ Teamwork
- ❖ Coordination
- ❖ Analytical Reasoning
- ❖ Reliability
- ❖ Eager to Develop
